Über das Projekt

Das Symposium „Music & Mathematics" ist an der Schnittstelle von Musik und Mathematik angesiedelt und bietet eine Plattform für den interdisziplinären Austausch von Musiker*innen und Komponist*innen, Musikwissenschaftler*innen, Informatiker*innen und Mathematiker*innen. Neben klassischen Vorträgen werden daher auch künstlerischen Interventionen zu hören und zu sehen sein. Wir freuen uns auf die spannende Projekte, musikalische Präsentationen und rege Diskussionen in einer interdisziplinären Gruppe.

Die Veranstaltung ist zweiteilig und beginnt am 27. November 2020 mit einem Workshopformat. Für den Vortrag konnten wir Martin Supper zum Thema "Einige Anmerkungen zu Musik und Mathematik von Iannis Xenakis gewinnen. Im Anschluss folgt eine impulsgeleitete Diskussion.

Das Symposium selbst findet am 16. und 17. April 2021 in digitaler Form statt.

SYMPOSIUM, 16.04. UND 17.04.2021

Wir laden ein zum zweitägigen Symposium „Music & Mathematics" am 16. und 17. April 2021. In Vorträgen, Diskussion und musikalischen Beiträgen beleuchten unsere Gäste das Spannungsfeld von Musik und Mathematik. Timo de Wolff, Miriam Akkermann und Dirk Pflüger führen durch das Programm.

Die Veranstaltung findet in englischer Sprache digital über Zoom statt.
Um Anmeldung wird gebeten.

PROGRAMM
Freitag, 16.04.2021 / 13.30 – 21.30 Uhr

13.45 Uhr Welcome
Timo de Wolff, Miriam Akkermann, Dirk Pflüger (Die Junge Akademie)

14.00 – 15.00 Uhr Vortrag und Musik
Maurice Rojas: „Can You Hear Pseudorandomness?"

15.30- 16.30 Uhr Vortrag und Musik
Kathlen Kohn (KTH Stockholm) und Ernst Ulrich Deuker: „The Complex of Non-Chromatic Scales" Musik: Ernst Ulrich Deuker

17.00 – 17.30 Uhr Visuals
Michael Sedlmair (Universität Stuttgart): „Visualizing Music."

17.30 – 18.00 Uhr Visuals
Rainer Groh (TU Dresden): „Reverse engineering of sound visualizations"

19.30 – 21.00 Uhr Keynote und Diskussion
Margaret Schedel (Stony Brook University): „Secret Analogies: Finite and Infinite"

Samstag, 17.04.2021 / 9.30 – 14.00 Uhr

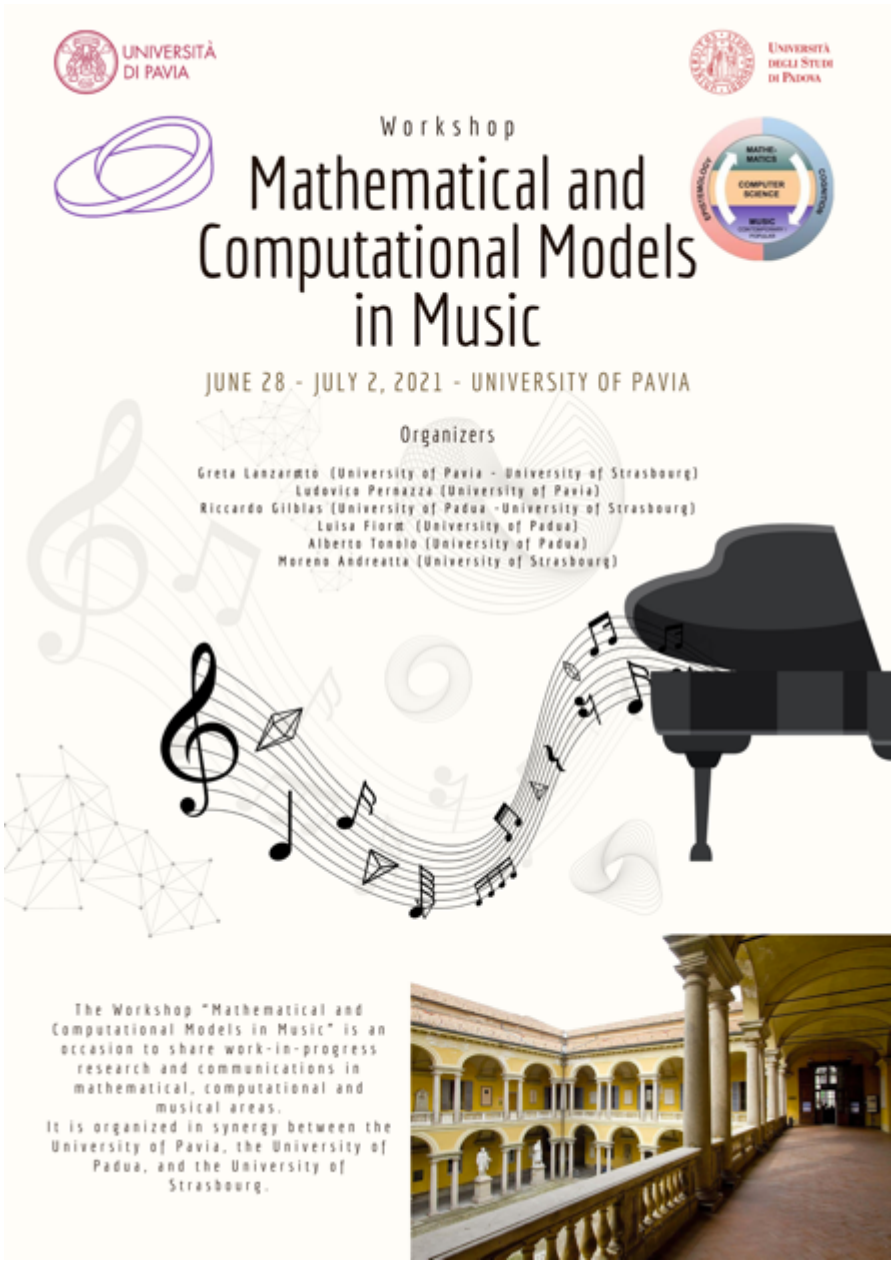
9.30 – 10.30 Uhr Musik
Martin Supper (Universität der Künste Berlin): „From Mycenae-Alpha (1978) to Gendy3 (1991)."
Musik: Iannis Xenakis: Gendy3

10.30 – 11.00 Uhr Vortrag
Stefan E. Schmidt (TU Dresden): „What is an interval in music? Algebraic measurement aspects of how we may think tonal distance."

11.30 – 12.30 Uhr Vortrag
Moreno Andreatta (University of Strasbourg): „From Music to Mathematics and backwards: come perceptual and cognitive implications of algebraic, topological and category-theory models in computational music analysis"

13.00 – 14.00 Uhr Musik
Gilles Baroin (University of Toulouse):
Musik: Gilles Baroin

Future events: music&maths at the University of Pavia



Preliminary list of speakers:

- Giovanni Albini
- Emmanuel Amiot
- Mattia Bergomi
- Anthony Coniglio
- Isaac Del Pozo
- Julio Estrada
- Riccardo Gilblas
- Saba Goodarzi
- James Hughes
- Jeremy Kastine
- Mihalis Kolountzakis
- Greta Lanzarotto
- Jordan Lenchitz
- Maria Mannone
- Mariana Montiel
- Robert W Peck
- Alexandre Popoff
- William Sethares
- Dmitri Tymoczko
- Jason Yust
- …

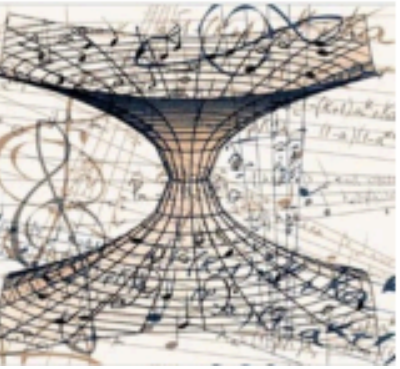
UNIVERSITÀ DEGLI STUDI DI PADOVA

DIPARTIMENTO MATEMATICA

Dipartimento di Matematica "Tullio Levi-Civita"



The Department of Mathematics "Tullio Levi-Civita" of the University of Padova is offering a thematic PhD position in Mathematic and Music titled:

Mathematics and Music:
algebraic, categorical and computational methods
in the maths/music research

NEW 2020-2021

Two doctoral courses (**36h, May-June 2021**):

- Moreno Andreatta: An overview of some research axes in **Mathemusical Research**
- Emmanuel Amiot: **Discrete Fourier Transform** in music analysis: from tilings to musical scales
- Greta Lanzarotto: **Tiling Canons** and Fuglede Spectral Conjecture
- Franck Jedrzejewski: **Homometry** and neo-Riemannian Theory
- Thomas Noll: **Word theory** and its application to scales, modes, chords and rhythms
- Alexandre Popoff: **Category-Theory** formalization of transformational music analysis

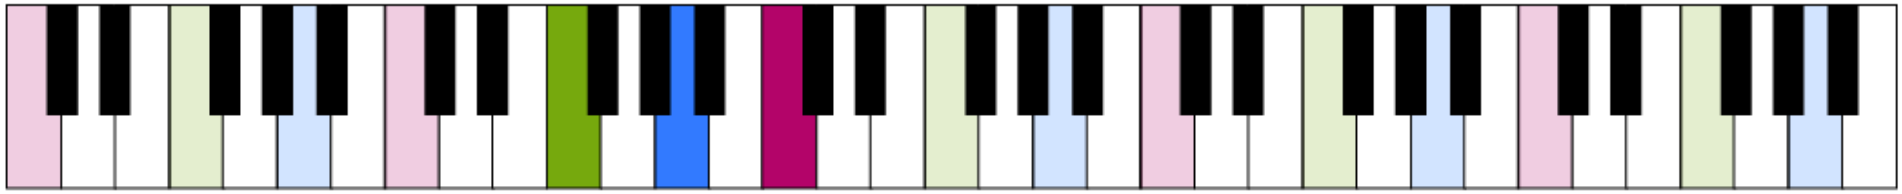
LAUREATE FORUM
FOUNDATION

May. 17, 2019 to Dec. 2020

https://imaginary.org/



La.La.Lab brings the visitor to an interactive exploration and discovery of music from a mathematical perspective. The exhibition pivots over three axis:

- **Music theory.** Learning what tools build music, and how these tools are used to create art. Basic concepts and historical comments.

- **Current research.** The latest trends of research in the connection of maths and music. Artificial Intelligence, theoretical and new instruments, classification and composition tools.

- **Art and entertainment.** A joyful display of artworks from artists and mathematicians in the field. Talks/concerts at scheduled events

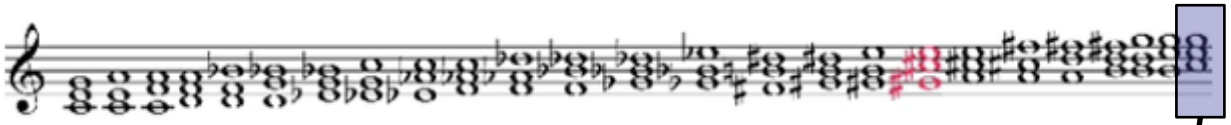
Reading Beethoven backwards



Le Blé en Herbe

(Polo/Moreno/Dieu)

Plonger comme un enfant, cheveux au vent
Sous l'océan du blé en herbe
Marée d'épis couleur d'amande
Qui tendent à caresser le ciel

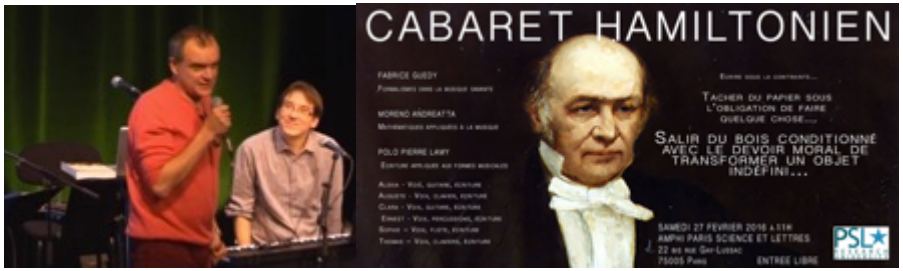
Algues tendres de mille plages
Frôlant le ventre des nuages
Cheveux de pluie, dos de poissons
Qui frissonnent à l'unisson

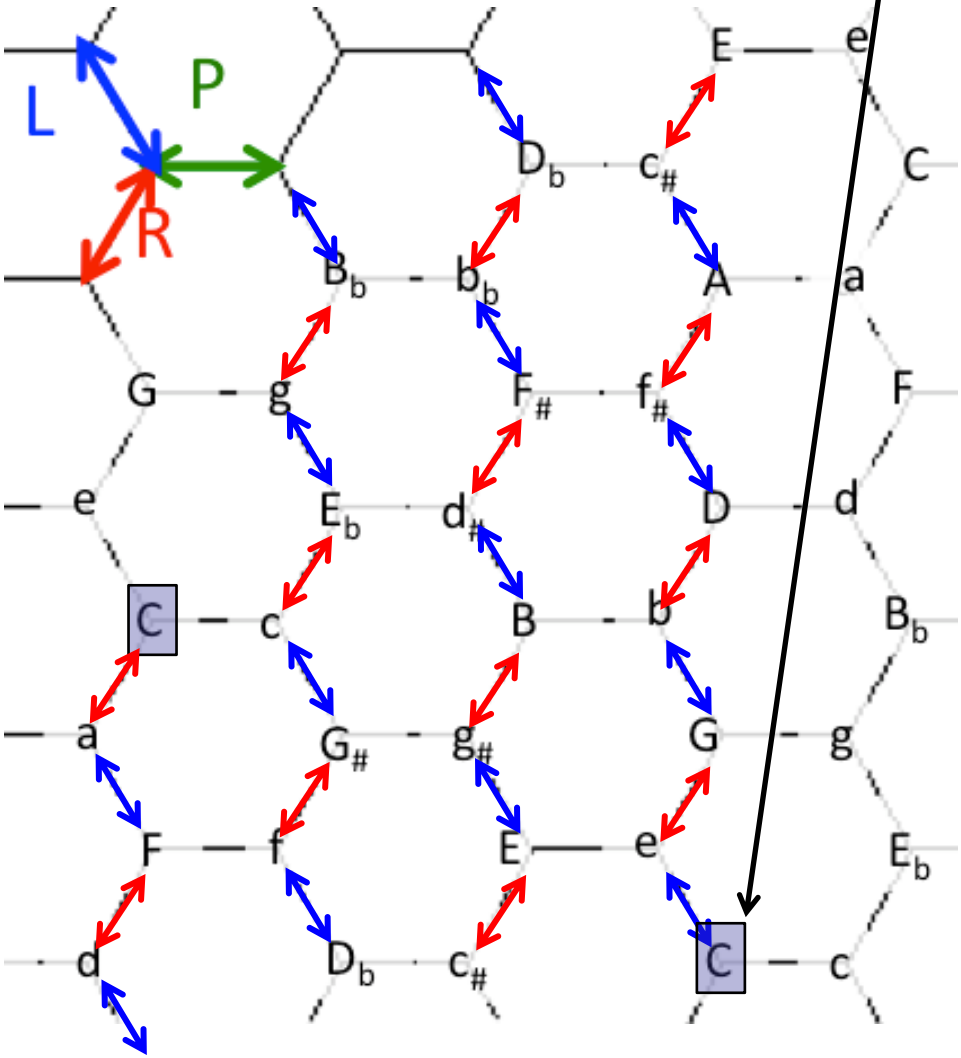
Suivre le bord des continents
Dans l'océan du blé en herbe
Pécher le corail du pavot
Dans le sang des coquelicots

Croiser matin dans l'herbe folle
Deux tourterelles qui s'envolent
Suivre les jeux des hirondelles
Sur le paysage éternel
Nager comme un enfant, cheveux au vent
Sous l'océan
Du blé en herbe

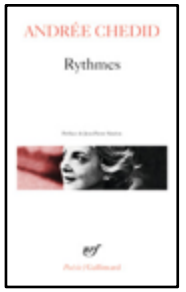
Marée de fruits au goût amer
Acide et salée comme la mer

Vers l'ilôt d'un petit village
Vers un château d'eau sur la plage
Quand tout s'éteint avant l'orage
Quand se lève le vent du large
Sur le blé vert





From poetry to song writing: hamiltonian compositional strategies



A part (Andrée Chedid, poème tiré du recueil *Rhymes* Collection Poésie/Gallimard (n. 527), Gallimard, 2018)

À part le temps
Et ses rouages
À part la terre
En éruptions
À part le ciel
Pétrisseur de nuages
À part l'ennemi
Qui génère l'ennemi

À part le désamour
Qui ronge l'illusion
À part la durée
Qui moisit nos visages

À part les fléaux
À part la tyrannie
À part l'ombre et le crime
Nos batailles nos outrages

Je te célèbre ô Vie
Entre cavités et songes
Intervalle convoité
Entre le vide et le rien

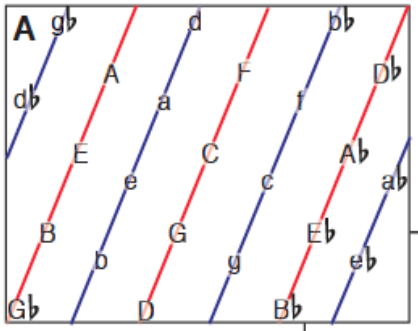
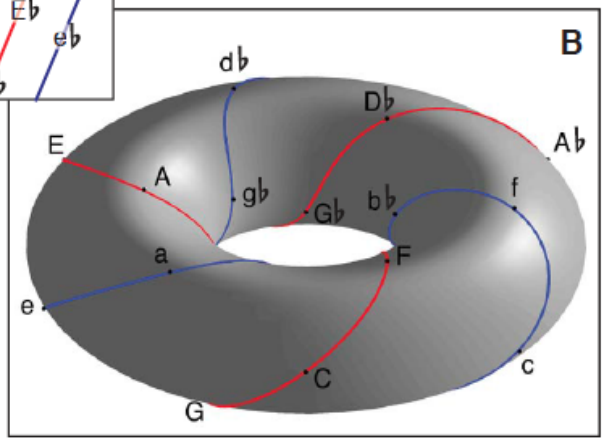
Neurosciences and *Mathemusical* Learning: ProAppMaMu



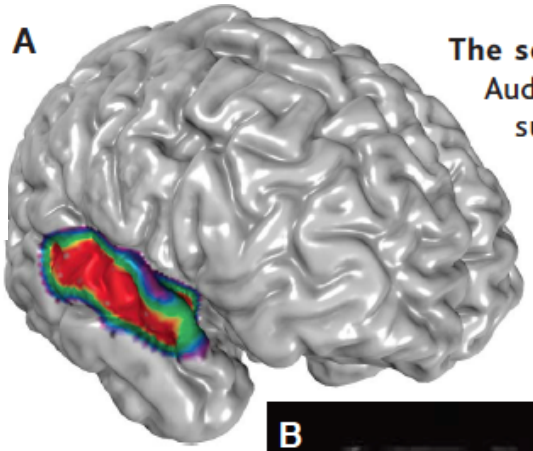
PERSPECTIVES: NEUROSCIENCE

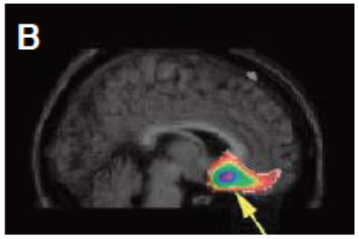
Mental Models and Musical Minds

Robert J. Zatorre and Carol L. Krumhansl



Mental key maps. (A) Unfolded version of the key map, with opposite edges to be considered matched. There is one circle of fifths for major keys (red) and one for minor keys (blue), each wrapping the torus three times. In this way, every major key is flanked by its relative minor on one side (for example, C major and a minor) and its parallel minor on the other (for example, C major and c minor). **(B)** Musical keys as points on the surface of a torus.





The sensation of music. (A) Auditory cortical areas in the superior temporal gyrus that respond to musical stimuli. Regions that are most strongly activated are shown in red. **(B)** Metabolic activity in the ventromedial region of the frontal lobe increases as a tonal stimulus becomes more consonant.
