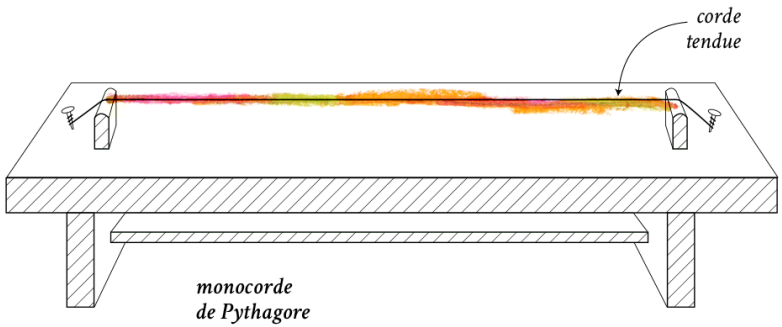
Pythagore et le monocorde

Les intervalles selon le monocorde



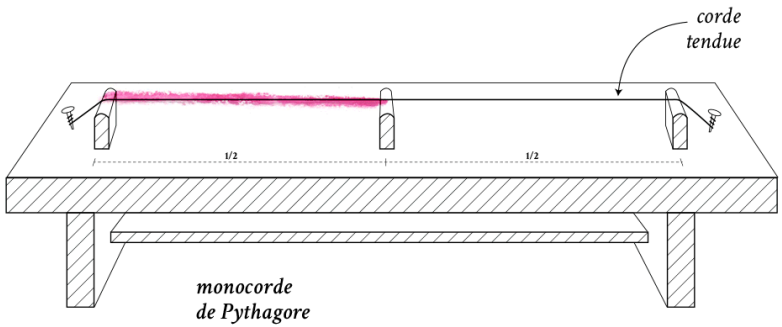
VOICI UNE NOTE

Le monocorde est un instrument contenant une unique corde tendue et une caisse de résonance.

Plus cette corde est courte, plus le son obtenu en la pinçant est aigu, car la **fréquence du son est inversement proportionnelle à la longueur de la corde**.

Ainsi, si le rapport de longueur de la corde est égal à 1 (comme ici), son rapport de fréquence sera égal à 1/1 donc 1 !

Les intervalles selon le monocorde



Longueur de la corde	Rapport de fréquence	Intervalle correspondant
1/2	2	OCTAVE

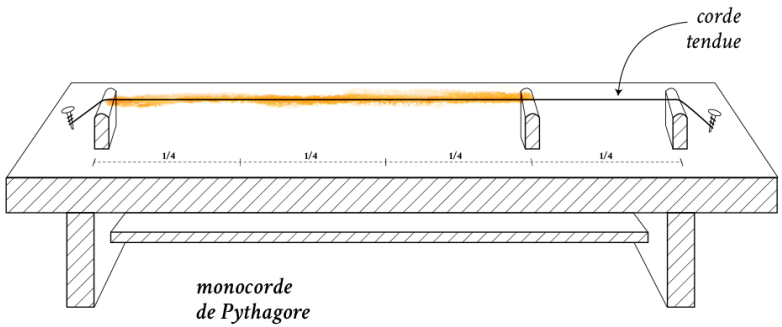
Le monocorde est un instrument contenant une unique corde tendue et une caisse de résonance.

Plus cette corde est courte, plus le son obtenu en la pinçant est aigu, car la **fréquence du son est inversement proportionnelle à la longueur de la corde.**

Ainsi, si le rapport de longueur de la corde est égal à 1 (comme ici), son rapport de fréquence sera égal à 1/1 donc 1 !

Si le rapport de longueur de la corde est égal à 1/2, son rapport de fréquence sera égal à 1/(1/2) donc 2, ce qu'on appelle l'intervalle d'**octave**

Les intervalles selon le monocorde



Longueur de la corde	Rapport de fréquence	Intervalle correspondant
3/4	4/3	QUARTE

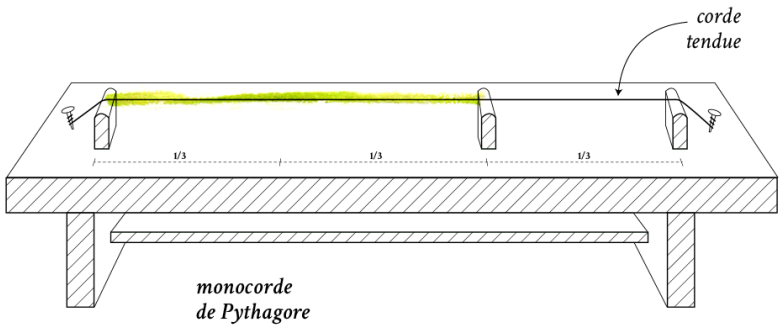
Le monocorde est un instrument contenant une unique corde tendue et une caisse de résonance.

Plus cette corde est courte, plus le son obtenu en la pinçant est aigu, car la **fréquence du son est inversement proportionnelle à la longueur de la corde.**

Ainsi, si le rapport de longueur de la corde est égal à 1 (comme ici), son rapport de fréquence sera égal à 1/1 donc 1 !

Si le rapport de longueur de la corde est égal à 3/4, son rapport de fréquence sera égal à 1/(3/4) donc 4/3, ce qu'on appelle l'intervalle de **quarte.**

Les intervalles selon le monocorde



Longueur de la corde	Rapport de fréquence	Intervalle correspondant
2/3	3/2	QUINTE

Le monocorde est un instrument contenant une unique corde tendue et une caisse de résonance.

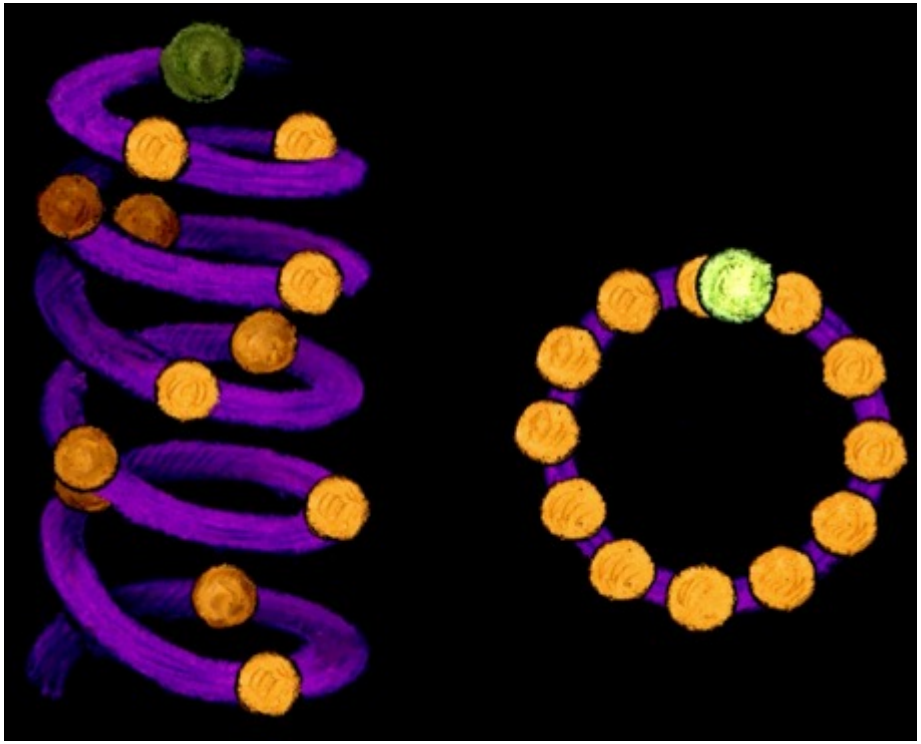
Plus cette corde est courte, plus le son obtenu en la pinçant est aigu, car la **fréquence du son est inversement proportionnelle à la longueur de la corde.**

Ainsi, si le rapport de longueur de la corde est égal à 1 (comme ici), son rapport de fréquence sera égal à 1/1 donc 1 !

Si le rapport de longueur de la corde est égal à 2/3, son rapport de fréquence sera égal à 1/(2/3) donc 3/2, ce qu'on appelle l'intervalle de **quinte.**

Comment construire une gamme à partir de la quinte (juste) ?

De quinte en quinte… à l'infini !



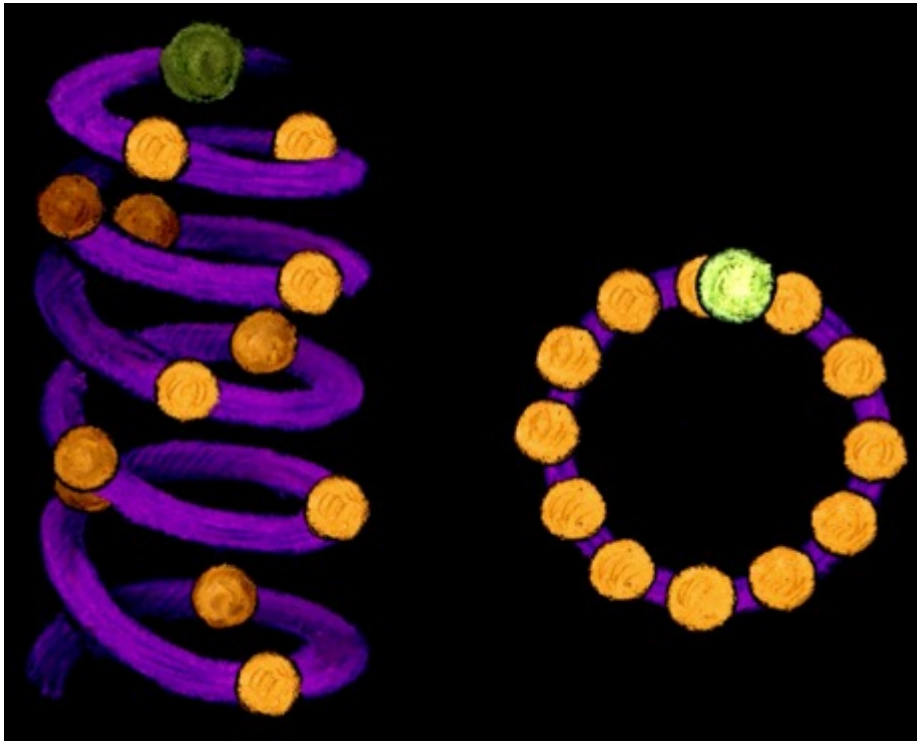
Calculer des puissances et des quotients en lien avec le **cycle des quintes**.

do (grave)	1
ré	$\frac{9}{8}$
mi	$\frac{81}{64}$
fa	

sol	$\frac{3}{2}$
la	$\frac{27}{16}$
si	$\frac{243}{128}$

do (aïgu)	2
ré	
mi	
fa	

De quinte en quinte… à l'infini !



Calculer des puissances et des quotients en lien avec le **cycle des quintes**.
Mettre en place un raisonnement mathématique pour **prouver que le cycle des quintes est infini.**

La **preuve par l'absurde** : supposons qu'un multiple de la quinte est égal à un multiple de l'octave et montrons que cela conduit à une contradiction.

FRANGIFLUTTI
(L. Mello / M. Andreatta)

Nel rifrangere i nostri cuori,
– gente nata che esige cura –
sono stato tra i meno bravi
nella tua favola insicura.

NL

Ora è tardi lo so oramai
venti freddi come una fiaba
però tengo a cantare il canto
Eva sola che resta maga.

NL

Eva cenno di ribellione
Eva fascio pronto all'addio
Eva donna che sa parlare
Al silenzio fatto d'oblio.

NL

Sai parole da incatenare
sai sorridere per piacere
sai scappare senza tornare
sai ferire e sai far l'amore.

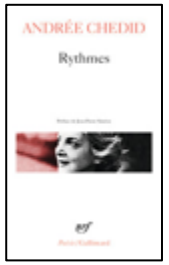
A nouveau le zig-zag de Beethoven (mais en modalité mineure)



A part (Andrée Chedid, poème tiré du recueil *Rythmes* Collection Poésie/Gallimard (n. 527), Gallimard, 2018)

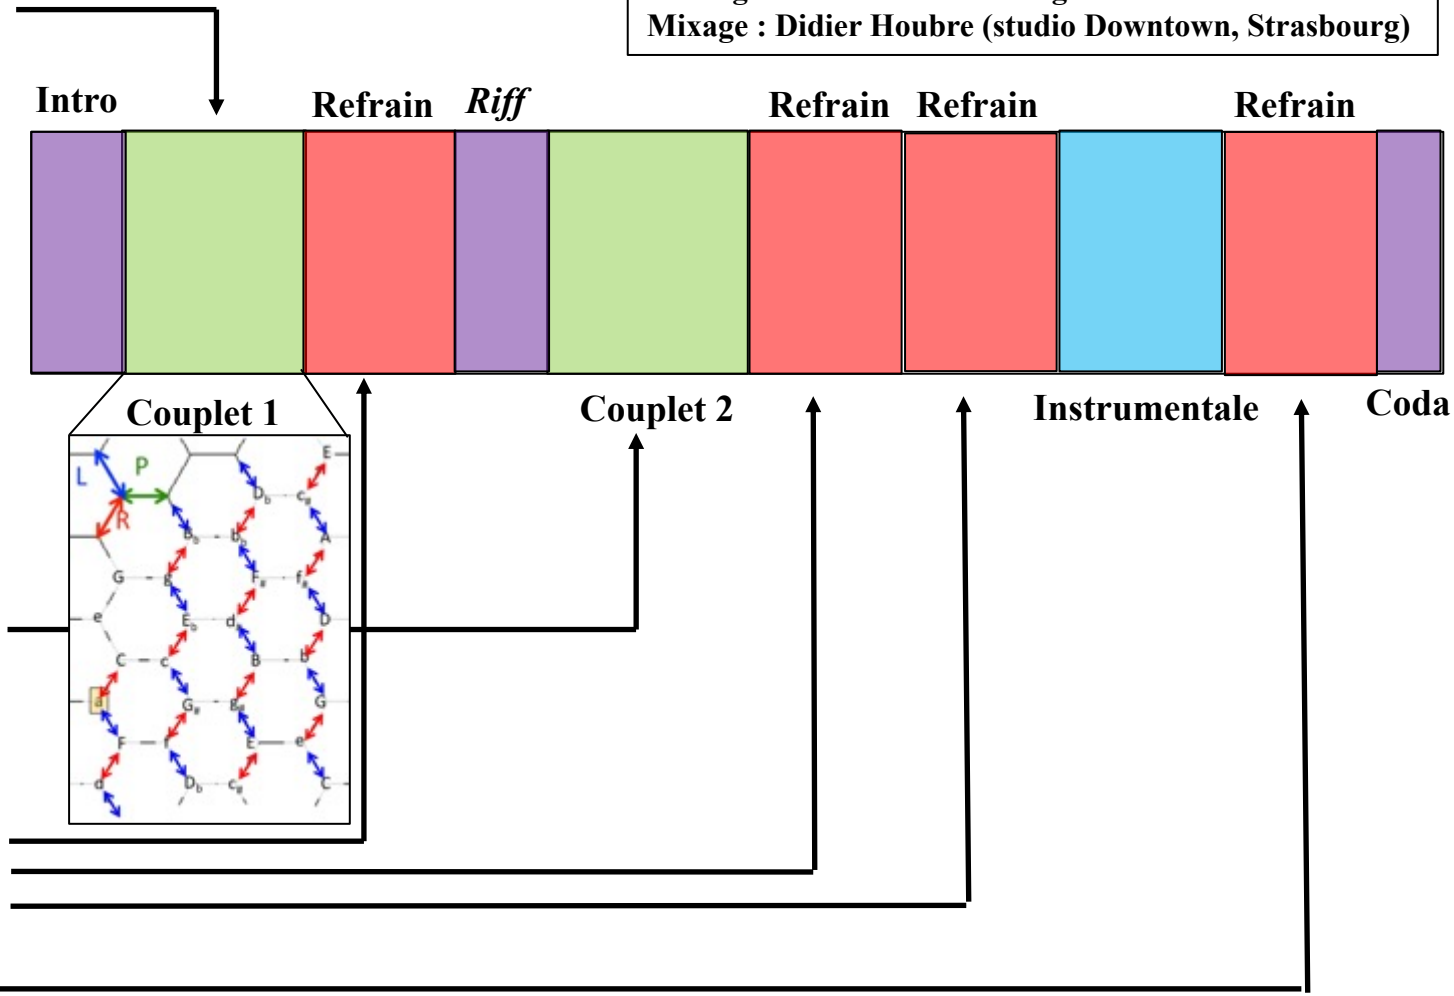
Composition : Moreno Andreatta
Arrangement : Benoît Messinger
Mixage : Didier Houbre (studio Downtown, Strasbourg)

À part le temps
Et ses rouages
À part la terre
En éruptions
À part le ciel
Pétrisseur de nuages
À part l'ennemi
Qui génère l'ennemi

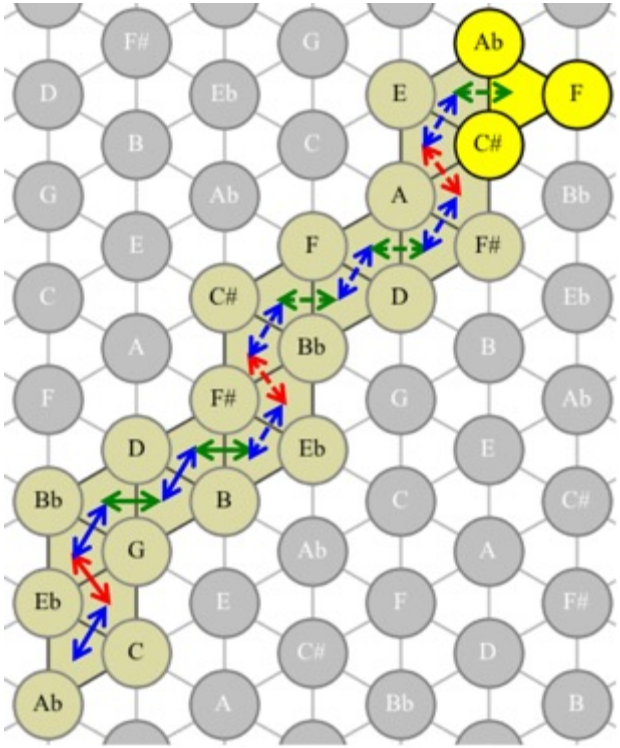
À part le désamour
Qui ronge l'illusion
À part la durée
Qui moisit nos visages

À part les fléaux
À part la tyrannie
À part l'ombre et le crime
Nos batailles nos outrages

Je te célèbre ô Vie
Entre cavités et songes
Intervalle convoité
Entre le vide et le rien



La sera non è più la tua canzone (sur un texte de Mario Luzi)

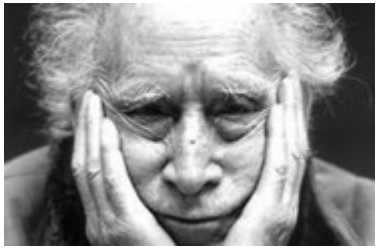


La sera non è più la tua canzone,
è questa roccia d'ombra traforata
dai lumi e dalle voci senza fine,
la quiete d'una cosa già pensata.

Ah questa luce viva e chiara viene
solo da te, sei tu così vicina
al vero d'una cosa conosciuta,
per nome hai una parola ch'è passata
nell'intimo del cuore e s'è perduta.

Caduto è più che un segno della vita,
riposi, dal viaggio sei tornata
dentro di te, sei scesa in questa pura
sostanza così tua, così romita
nel silenzio dell'essere, (compiuta).

L'aria tace ed il tempo dietro a te
si leva come un'arida montagna
dove vaga il tuo spirito e si perde,
un vento raro scivola e ristagna.



M. Luzi (1914-2005)

Le soir n'est plus ta chanson,
c'est ce rochet d'ombre transpercé
par les lumières et les voix sans fin,
la paix d'une chose déjà pensée.

Ah, cette lumière vive et claire vient
uniquement de toi, tu es si proche
du vrai d'une chose connue,
tu as pour nom une parole qui est passée
dans l'intimité du cœur où elle s'est
perdue .

Tombé est plus qu'un signe de la vie,
tu te reposes, du voyage tu es revenue
à l'intérieur de toi même, tu es
descendue dans cette
pure substance qui est si tienne,
si éloignée
dans le silence de l'être, achevée.

L'air se tait et le temps derrière toi
se lève tel une montagne aride
où plane ton esprit et se perd,
un vent rare glisse et stagne.

(tr. Antonia Soulez, philosophe et poète)

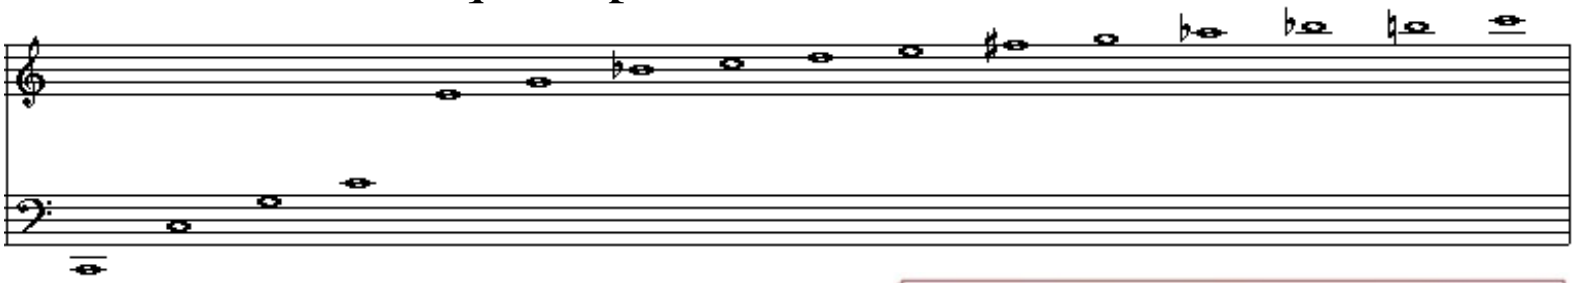
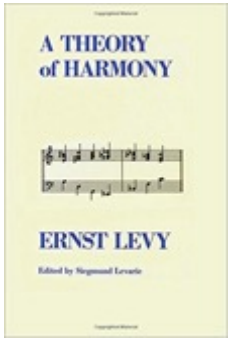
La « Negative/Symmetric Harmony » (de Jacob Collier/Steve Colemann)

La série des harmoniques supérieurs





"The raw material of theories are facts. The raw materials of musical theory is music. Music is not, as some contemporary acousticians would like us to believe, 'something that happens in the air.' It is something that, first and last, happens in the soul."

Ernst Lévy
(1895-1981)

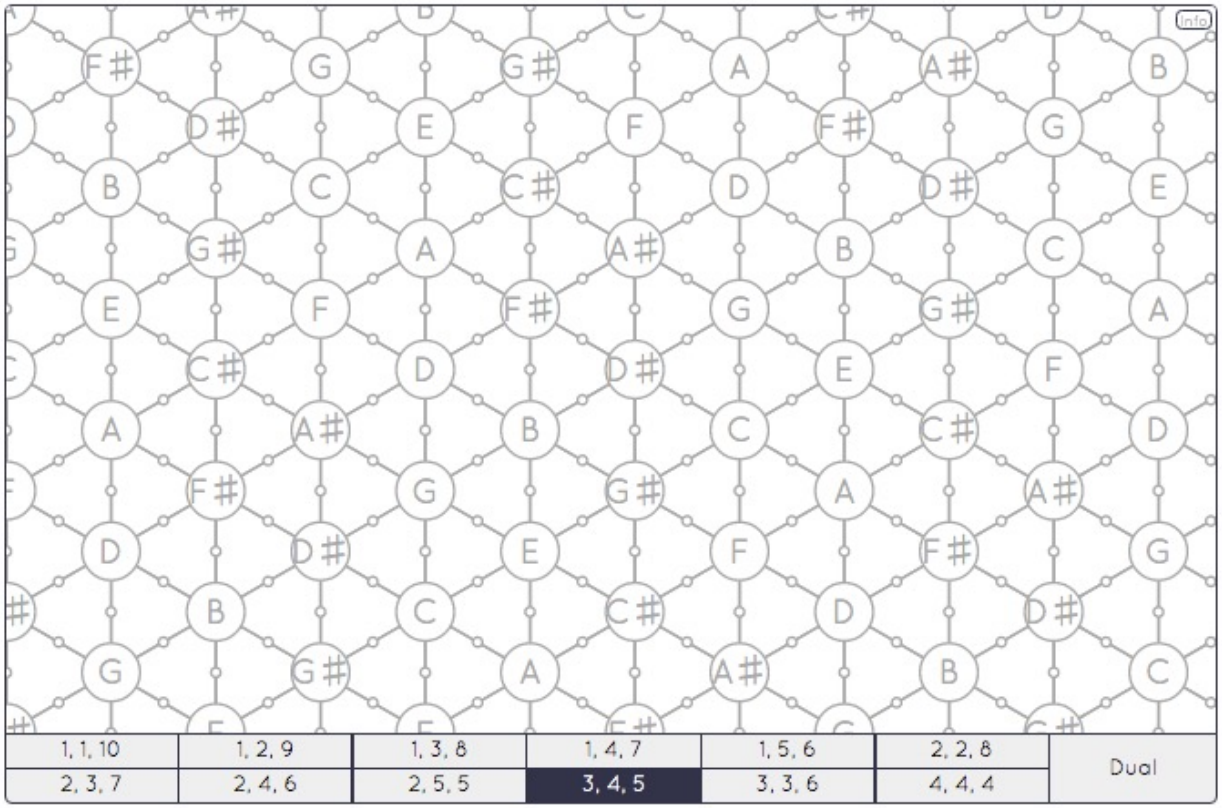
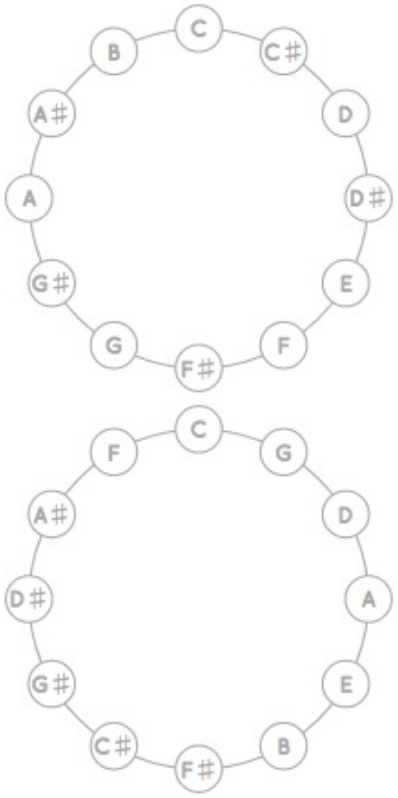
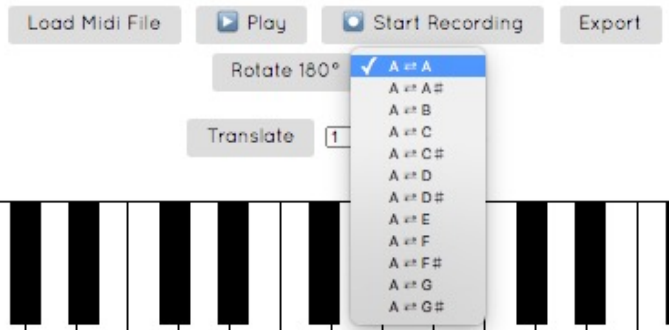
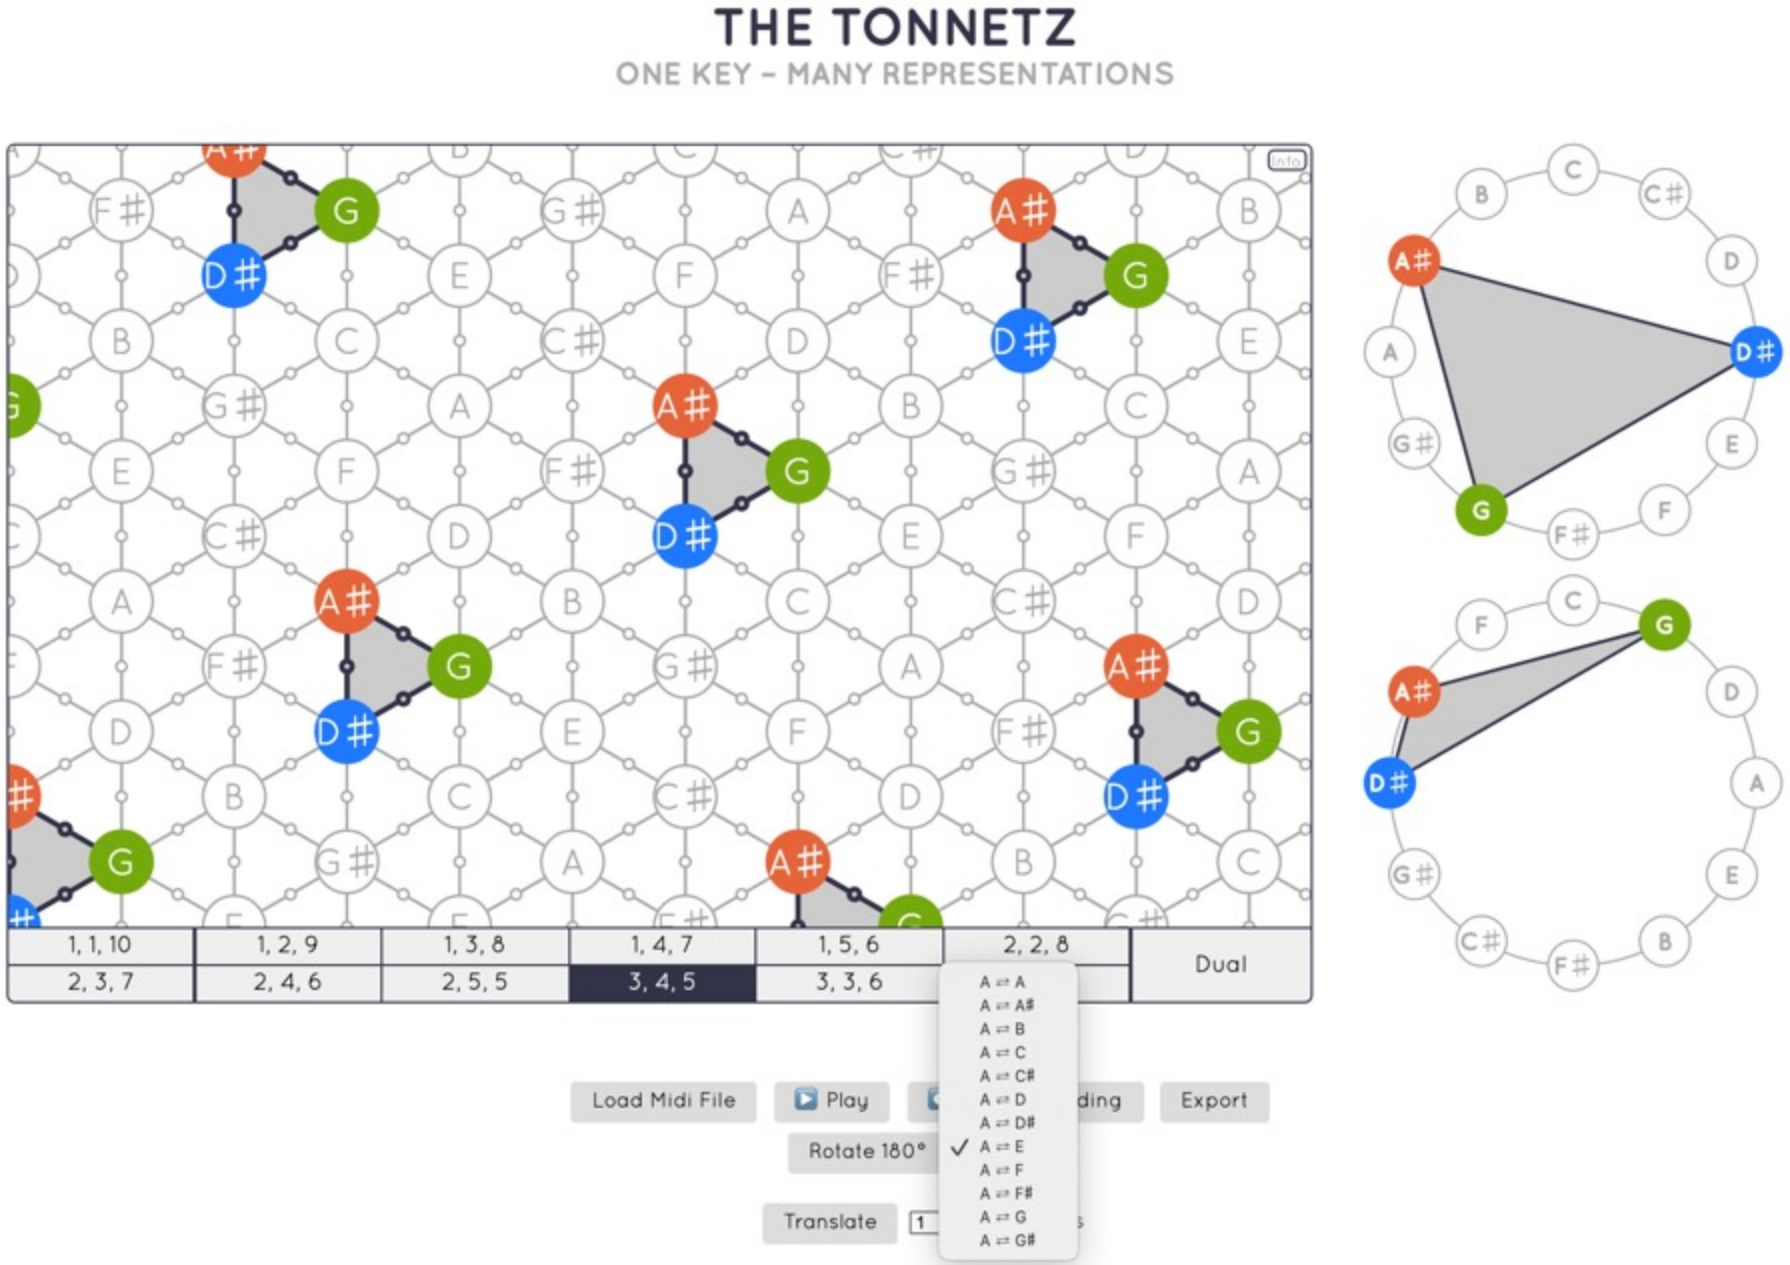
Harmonie négative dans l'environnement *Tonnetz*





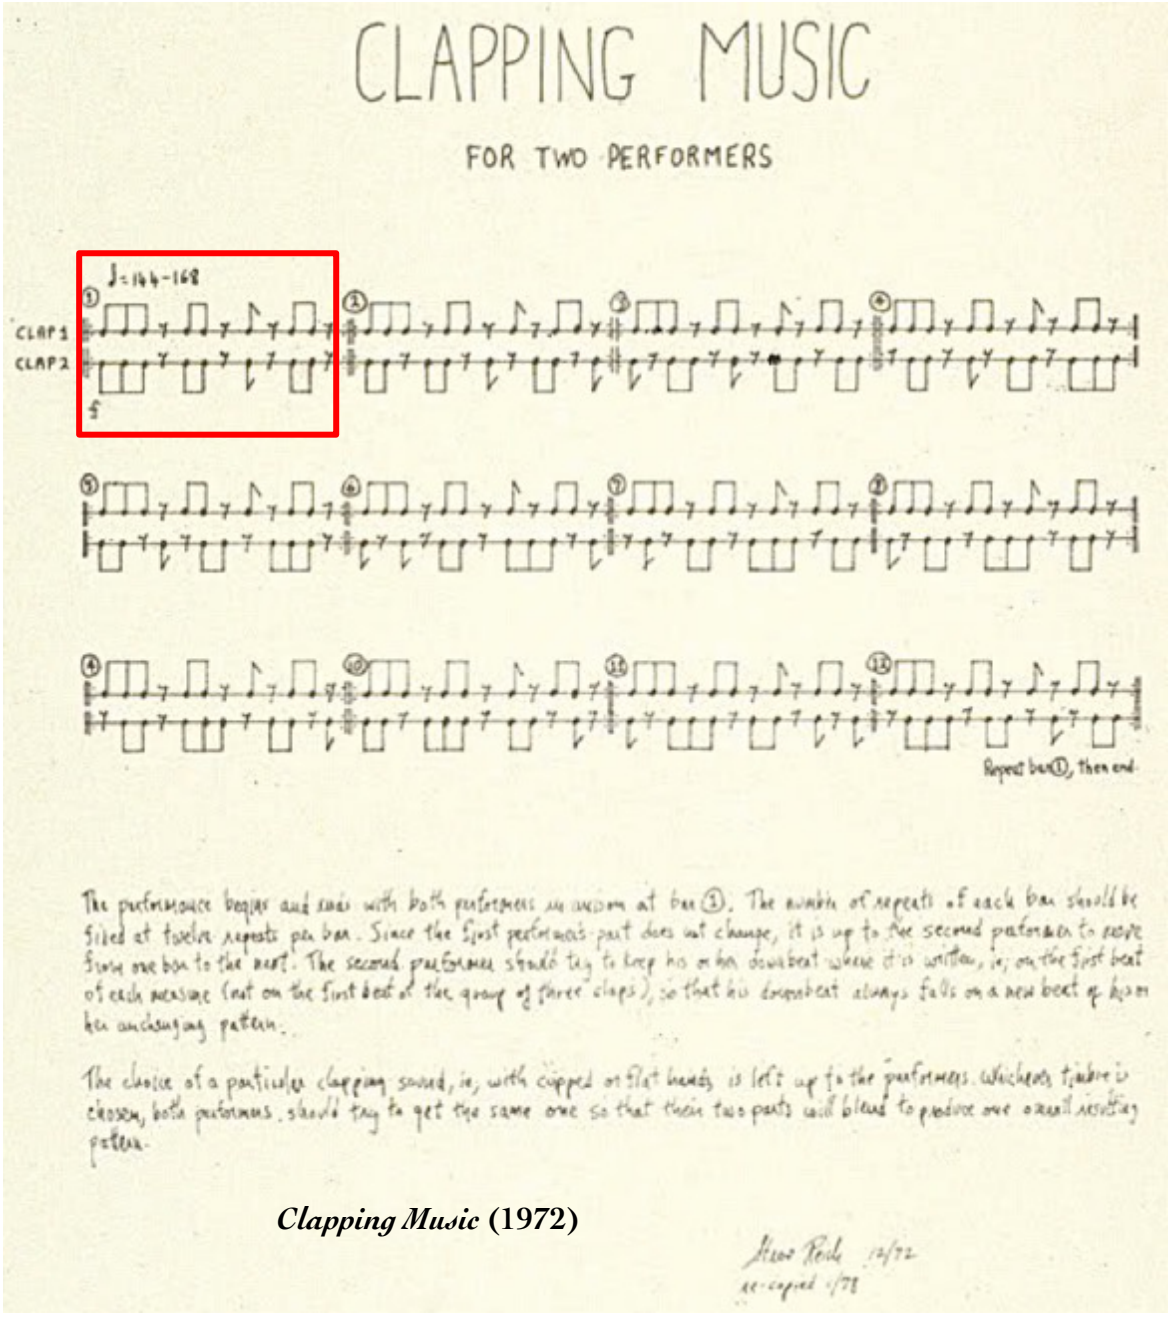


Exemple : harmonie négative de *Your Song* (E. John)



Et le rythme ?

Le « cercle rythmique » et ses rotations



CLAPPING MUSIC

FOR TWO PERFORMERS

♩=144-168

CLAP 1

CLAP 2

Repeat bar ①, then end

The performance begins and ends with both performers in unison at bar ①. The number of repeats of each bar should be fixed at twelve repeats per bar. Since the first performer's part does not change, it is up to the second performer to move from one bar to the next. The second performer should try to keep his or her downbeat where it is written, i.e. on the first beat of each measure (not on the first beat of the group of three claps), so that his downbeat always falls on a new beat as he or she unchanging pattern.

The choice of a particular clapping sound, i.e. with cupped or flat hands, is left up to the performers. Whichever timbre is chosen, both performers should try to get the same one so that their two parts will blend to produce one overall resulting pattern.

Steve Reich 12/72

re-copied 1/73
